DETAILED ACTION

This communication is in response to the communication filed December 16, 2002, Paper No. 28.

Claims 1-41, 51-74 are pending in the instant application.

The indicated allowability of claims 1-41, 51-74 is withdrawn upon further consideration of written description and enablement issues which must be addressed and that pertain to the pending claims.

Election/Restriction

However, pursuant to 37 C.F.R. 1.142(a), whereby the distinctness and independence of the inventions of the instant application have become clear upon further consideration, an examiner's action on the merits of the pending claims insofar as they pertain to the elected invention is hereby deferred until an election has been made. (See MPEP 810.02 and 811)

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, 66-72, drawn to methods of inducing an antigen-specific immune response in a subject, classified in class 514, subclass 44.
- II. Claims 27-41, 73, 74, drawn to methods of increasing platelet counts in a subject, classified in class 514, subclass 44.
- III. Claims 51-65, drawn to methods of treating and preventing anemia in a subject, classified in class 514, subclass 44.

Art Unit: 1635

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are biologically and functionally distinct from each other and thus one does not render the other obvious. The methods of the three distinct groups comprise steps which are not required for or present in the methods of the other groups: methods of inducing an antigen specific immune response in a subject comprising the administration of oligonucleotides and antigens (Group I); methods of increasing platelet counts in a subject comprising the administration of oligonucleotides (Group II); and methods of preventing and treating anemia in a subject comprising the administration of oligonucleotides (Group III). The end result of the methods are different: inducing an antigen specific response (Group I), increasing platelet counts (Group II), and preventing or treating anemia (Group III). Thus, the operation, function and effects of these different methods are different and distinct from each other. Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1635

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

Certain papers related to this application may be submitted to Art Unit 1635 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)). The official fax telephone numbers for the Group are (703) 308-4242 and (703) 305-3014. NOTE: If Applicant *does* submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Jane Zara** whose telephone number is **(703) 306-5820**. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader, can be reached on (703) 308-0447. Any inquiry regarding this application should be directed to the patent analyst, Katrina Turner, whose telephone number is (703) 305-3413. Any inquiry of a
